

GOUGAR

ROAD STUDY

Public Information Meeting

June 1, 2021

PHASE I, II, & III

The Gougar Road Study is currently in the first of three phases in the Will County Division of Transportation's project development process.

Phase I encompasses the engineering and environmental studies for the improvement. Proposed geometry, environmental concerns, as well as right of way requirements are defined. Public informational meetings and public hearings will be held. This provides an opportunity for those interested to express their views and ask questions regarding the proposed improvements.

Phase II contract plans are prepared and the necessary right of way is acquired.

Phase III is the actual construction of the improvement.

WE ARE
HERE

* Phases II and III as currently programmed. Subject to change based on availability of funding and project readiness.

QUESTIONS, COMMENTS, AND INFORMATION

Your comments are valuable to us. To submit a comment, fill out the comment form at GougarRoadStudy.com, or pick up a printed copy from the Will County office and send or email to:
